PROTECT OUR BAY - GARDEN THIS WAY  
ADD CLAY TO IMPROVE SANDY SOILS

## ADD CLAY TO IMPROVE SANDY SOILS

Garden Guardians of the Bay will save the day - protecting Geographe Bay for all of us.

### PROTECT OUR BAY

The fertilisers that we put on our gardens run off into waterways and groundwater. The health of Geographe Bay and local wildlife is at risk if this nutrient runoff increases.

### GARDEN THIS WAY

Garden Guardians keep nutrients where they belong:

Grow native plants. Add clay to sandy soils. Apply soil wetter. Use mulch.

Clay modifies the soil structure so that it will hold moisture. You only need to add it once to improve sandy soil.

It's simple to do but always follow the recommended rates. Clay can be added into new gardens and lawns by digging in to 20cm depth. Sprinkle it onto established lawns and gardens before lightly watering and raking in. Prepare holes for new plants by combining clay into the existing soil.

Become a

## GARDEN GUARDIAN OF THE BAY

and have a beautiful garden that also takes care of the environment.
